

REPORT ON BUILDING LOI NONG KINDERGARTEN – THUY CHAU COMMUNE- HUONG THUY SUBURB –THUA THIEN HUE PROVINCE

Morning on April 5th 2010, Loi Nong kindergarten has been officially inaugurated. The inauguration formally took place with participation of the representatives from FHF, HueFO, CESR , local leader and all of teachers and students and especially local residents in Loi Nong Hamlet. Because of its usefulness for beneficiaries, it is paid much attention to the local people. This kindergarten helps to create many favourable conditions for students to study and provide the local residents with a place used for holding a meeting and by this way, they can exchange doing business together and tie the neighbouring relationship. At the same time, this place is also used for flooding shelter which is full of over 200 people.

The construction is officially begun on August 21st 2009 and is completed on April 5th 2010. During the process of its construction, changeable weather and lasting flood have great impacts on its progress. However, due to its necessity to beneficiaries especially kindergarteners, project group and local leader often carried out closely monitoring in bad weather condition to foster construction progress.

At that time of work acceptance, its total of budget is approximately of 750 million dong. Other funding sources as followed:

- 1) FHF: 15,000 US dollars (equivalent with 270 million dong)
- 2) FESR: 15,000 US dollars
- 3) Local people: 210 million dong (equivalent with around 12,000 US dollars)

We really have high appreciation to receive the assistance from two family households in donating 150 square meters in area for extending the scope of school-yard. In addition, Loi Nong people also volunteer to contribute working days with the total budget of 50 million dong. Due to construction's initiation, there still lacks of study equipments for students. Based on the overseas funds, CESR offered them an organ for bettering their study at school. This presents come from two Japannese families who is always very active in preschool education in Thua Thien Hue province.

With its practical meaningfulness in improving life's quality, the construction highly appreciated by local gorvenment, relevant partners and local residents. Through that, they express their gratitude to overseas donors who contribute to project's success. Besides, that is also a good effort of relevant partners like FESR, FHF, HueFO, local government and Loi Nong people.
