

SCHOLARSHIP - GIVING ACTIVITY

HUE CITY - 2009

According to the plan, this month we will give the scholarship to collaborators who have great contributions to micro-finance program at almost of quarters and communes in Hue city. We plan to carry out the meaningful activity at the beginning of August on the first day to school. Due not to draw the attention of local government, for this year, our management board decided there is no announcement to locality and no option of good students as before....Moreover, we also make a priority the collaborators' children in this scholarship, so we just visited their houses to get their commendations and their children's studying achievements. Collaborating with monthly micro-finance operation, we conducted to give scholarship and a small gift for students. When receiving the scholarship from us, they expressed most deeply gratitude to the President Lien Doan Phung and management board who facilitates them to buy some stationery and advanced books and their school fees. On this occasion, they promise to study well so that we can help parents to improve their lives and hope to get much more intention of us. Obviously, although amount of VND 500.000 is not too much for students, this cherishes the feeling of the President for the collaborators on financing efforts to FESR's success .We think that this meaningful activity should be lasted in the next years.
